VelaShape III provides a highly effective solution for comfortable, non-invasive, body contouring for a wide range of patients and treatment areas.

Cellulite and circumference reduction treatments with VelaShape III entail zero downtime and little or no discomfort. Short treatment sessions and outstanding results, from as little as a single session, mean high productivity and revenues for your clinic, and high satisfaction for your patients.

VelaShape III is CE-marked for body contouring and FDA-cleared for circumference reduction of the abdomen and thighs and temporary reduction of cellulite. With more than 1 million VelaShape procedures performed yearly, VelaShape III has proven time and again its ability to deliver noticeable, measurable and consistent results. It has changed lives, improved self-esteem, and eased self-image issues.

Top-performing Solution, Now Better Than Ever

Now, VelaShape III with Guided Mode offers an enhanced treatment experience – for both patients and operators. The advanced software simplifies operation and minimizes technique sensitivity, further improving comfort level. The result: even more reliable and effective treatments, every time.
VelaShape is my workhorse body shaping product. It is a must-have for any cosmetic or dermatologic surgeon offering surgical and non-surgical body shaping. VelaShape is my go-to for cellulite improvement and skin tightening, and a complement to body shaping procedures.

Jason Emer, MD, Dermatologist, Beverly Hills, CA, USA

Access the Fastest-growing Market Segment

Global Body Shaping and Skin Tightening Market¹

Fastest-growing segment by volume: 10M+ procedures expected in 2019

40% growth in physicians’ treatment revenues by 2019

Addressing Patients’ Needs²

85-98% of women aged 16+ have cellulite
72% are not satisfied with their bellies
91% of women want to change some aspect of their body
81% of women are concerned about maintaining their body shape

Profitable Business Driver

Grow your business with shorter treatment times and fewer sessions.

- **Treat more patients in a day** – With 15-minute sessions per sub-area.
- **Add more patients to your practice** – Excellent results in just 1-3 sessions.
- **Affordable entry to high-demand market** – Gain new revenues from a fast-growing body contouring segment.
- **Recurring revenues generator** – Returning customers for maintenance sessions.

Superior Efficacy

Improve outcomes for body contouring, circumference reduction, cellulite improvement, and skin tightening.

- **1 minute to temperature of 42°C** – Unique 150W RF power and consistent energy delivery sustain target temperature throughout the treatment time.
- **Optional single-session protocol** – Average 2.6 cm circumference reduction.
- **100% response rate** – Achieving at least 1.5 cm circumference reduction after 1 session, proven in 42-patient study.
- **Effective complementary therapy** – Boosts results from other fat destruction procedures, such as UltraShape and liposuction.

Now with New Guided Mode

Unmatched Body Contouring Results
Enhanced User Experience

Enjoy easier, more reliable, patient-centric operation with new Guided Mode software and advanced system design.

- **Standardized treatment guidance** – Minimizes operator dependency and allows safe delegation to operators.
- **Step-by-step guided process** – Eliminates the need to count pulses and navigate, increases motivation, reduces user fatigue, and improves the operator experience.
- **Versatile system** – Operator chooses between foot pedal or hand trigger operation, Guided Mode or Free Style; choice of 4 applicator covers.
- **Compact, ergonomic design** – Award-winning device fits in any treatment room; operator can sit or stand during treatment.
The Science Behind VelaShape

Use of Multiple Energies

Powered by Syneron’s patented elōs technology, VelaShape III combines IR (infrared), bi-polar RF (radiofrequency) and vacuum to precisely and effectively heat the tissue.

- Infrared light (IR) heats the tissue up to 3 mm depth.
- Bi-polar radio frequency (RF) heats tissue up to 20 mm depth.
- Vacuum ensures precise delivery of energy.
- Mechanical manipulation improves lymphatic drainage and cellulite smoothing.

Mechanism of Action

The combination of IR and vacuum-coupled RF technologies causes deep heating of the fat cells (adipocytes), their surrounding connective fibrous septae, and the underlying dermal collagen fibers.

The optimal design of the electrodes and the concurrent application of vacuum allows for deeper and faster heat penetration. In turn, this promotes an increase in circulation, lymphatic drainage, cellular metabolism and collagen depositing. It also stimulates fibroblast activity and remolds the extracellular matrix.

The result: A localized reduction in skin laxity, volume and an overall improvement in skin structure and texture.

VContour Applicator

- RF electrode design provides optimal skin contact and energy delivery.
- Disposable covers in 3 sizes – for hygienic, optimal treatment of all body parts.

VSmooth Applicator

- For cellulite reduction in large areas.
- Delivers a combination of modalities: bi-polar radio frequency (RF energy), Infrared light (IR), vacuum, and mechanical manipulation.
Proven Clinical Results

Recent Clinical Trial Results Showed:

- **2.6 cm** average circumference reduction after 1 session.
- **100% response** rate of at least 1.5 cm circumference reduction after 1 session (full abdomen).
